In obtaining the **FSC** (Forest Stewardship Council), **PEFC** (Programme for the Endorsement of Forest Certification Schemes) and **OLB** (Origine et Légalité des Bois/Timber Origin and Legality) certifications on our production sites in France, the origin of wood supplies from well-managed forests is now clearly proven.

This acknowledgement highlights our ongoing and longlasting commitment together with our forestry partners and confirms the model management of our manufacturing.

The Joubert Group supports the work of its partners involved in sustainable development.
